PROJECTS

Full Stack Web Developer – Groove Music

feb. 23 - mar. 23

Academic Experience.

Henry Bootcamp, Buenos Aires, Argentina.

A team project to create a platform for selling tickets to music events in Mar del Plata. It was implemented authentication, search, combined filtering, sorting, email sending, payment gateway. I was responsible for deploying services to production, reviewing code changes, monitoring project structure, refining functions, and resolving code conflicts. Followed modular approach and SCRUM methodologies for successful implementation.

Frontend: React 18, React-Admin, Redux, React Router, Material UI, Firebase

Backend: ExpressJS, Cloudinary, MailGen, MercadoPago, Firebase

Database: PostgreSQL y Sequelize.

Repository: <http://github.com/clarkos/new-proj-grupal>

Demo: <https://groove-tickets.vercel.app/>

Full Stack Web Developer – FoodFinder

dec. 22 - ene. 23

Academic Experience.

Henry Bootcamp, Buenos Aires, Argentina.

The project involved the implementation of a wide range of technical skills, allowing for search, combined filtering, and the addition of new recipes, among others. This platform provides nutritional information while allowing users to obtain a list based on the ingredients they request.

Frontend: React 18, Redux, React Router, Javascript, HTML5, CSS3

Backend: ExpressJS

Database: PostgreSQL y Sequelize.

Repository: <https://github.com/clarkos/PI-Food>

Demo: <https://foodpi-aqz4.onrender.com>

Frontend Web Developer – Life Door Ministries

Jun. 15 – Mar. 17

Volunteer Web Development

Mar del Plata, Argentina

The site was implemented to increase the reach of content generated from social media, allow for the playback of live-streamed events, and provide a listing of OnDemand videos obtained from YouTube. The implementation of SEO optimization placed the site within the top 5 results in Google searches, increased live event participation by 33%, and increased YouTube channel subscriptions by 48%.

At this moment, I'm working on an updated version of the site, with new technologies and layout improvements, using the following technologies.

Frontend: React 18, NextJS 13, Tailwind, Typescript

Backend: Solidity.io

Database: MongoDB

Sitio: <https://www.puertadevida.com>

PROFESIONAL EXPERIENCE

- **Sch Sistemas Informáticos - Mar del Plata, Arg.** **2014 – 2022**
I founded and managed my own technical support and cybersecurity business, offering repairs, installations, maintenance, and updates for computer equipment to local companies. Additionally, I implemented security systems on several stores that resulted in a significant reduction in criminal incidents thanks to dissuasive elements and alerts via SMS or app..
- **Freelance Web Developer – Radio Enlace** **May. 18 – Ago. 18**
Development and design of a website for a local radio station. Based on the CMS Wordpress, it included advanced functionalities such as audio and video streaming, as well as playback of on-demand content. Modern design techniques were applied to enhance the user experience, in addition to SEO optimization and the implementation of Google Analytics for audience measurement and PPC advertising.

TECNOLOGIES:

Programming Languages: PHP, Javascript, Java, Python

Frameworks: React, Next, Express.

Databases: MySQL, PostgreSQL.

Tools: Git, Slack.

Agile: Scrum.
